

MASTER PROJECT BLUEPRINT & IMPACT REPORT

MARUTHAM KART

FROM FARMERS • FOR EVERYONE

A comprehensive master operational blueprint, impact analysis, functional breakdown, and multi-year roadmap for India's revolutionary direct agritech marketplace and rural-urban cold-chain supply ecosystem.

HIGHER FARMER INCOME

Project Vision: Direct Farmgate Sourcing • Zero Wastage Supply Chain • True Farm Freshness

Stakeholders Empowered: Farmers, Urban Households, B2B Commercial Buyers, Delivery Logistics, Godown Operations

Digital Ecosystem: Multilingual Web, Android Mobile Native App, Fast2SMS OTP, Razorpay UPI, Gemini Agritech AI

Document Version: Master Executive Report • September 2026 Production Edition

1. EXECUTIVE SUMMARY @ THE CORE PROBLEM

Agriculture forms the backbone of India's economy, yet the traditional agricultural supply chain remains severely fractured. Between the rural farmgate and the urban kitchen table lies a labyrinth of 5 to 7 layers of intermediaries—local brokers, commission agents (Arhtiyas), mandi traders, wholesale syndicates, regional stockists, and neighborhood retailers.

■ The Dual Crisis in Traditional Agriculture

The Farmer's Plight

Farmers bear 100% of the production risk—erratic monsoons, soaring fertilizer costs, pest infestations, and relentless labor. Yet, they receive a measly **15% to 25% of the final retail price** paid by consumers. Distress selling is rampant, and post-harvest price manipulation forces farmers into chronic debt.

The Consumer's Dilemma

Households pay exorbitant prices for produce that has spent **3 to 5 days in transit** across open-air mandis. Produce is frequently subjected to artificial chemical ripening (calcium carbide), toxic dye baths, and synthetic waxing, stripping essential nutrients and creating severe health risks.

■ The MARUTHAM KART Solution

MARUTHAM KART fundamentally re-engineers this broken chain by establishing a direct, hyper-efficient, technology-driven marketplace and cold-chain logistics highway connecting verified farmers directly with retail consumers, residential communities, restaurants, and institutions.

ASPECT	TRADITIONAL BROKEN MANDI CHAIN	MARUTHAM KART DIRECT ECOSYSTEM
Intermediaries	5 to 7 layers of middlemen taking commissions	0 Middlemen (Direct Farm-to-Fork)
Farmer Realization	15% – 25% of retail price	60% – 75% of retail price (Instant Digital Payouts)
Farm-to-Kitchen Transit	72 to 120 hours (Loss of freshness & vitamins)	12 to 24 hours (Harvested at dawn, on table by dusk)
Post-Harvest Wastage	30% – 40% rotting and spoiled in transit	Under 3% via temperature-controlled godowns
Chemical Ripening	Widespread carbide usage, gas chambers, and artificial wax	100% Naturally Ripened & Organically Traceable
Customer Pricing	Highly inflated due to cumulative middleman cuts	20% – 30% lower than supermarket retail

2. IMPACT ANALYSIS: WHO WE HELP & HOW

1. How We Transform Life for Farmers

MARUTHAM KART treats the farmer not as a distressed seller, but as an empowered entrepreneur and core platform partner.

Fair & Transparent Farmgate Pricing

Farmers set or receive pre-agreed fair market prices for their harvests without predatory mandi deductions, weighing manipulations, or commission cuts. Payouts are transferred directly into the farmer's bank account via instant UPI/NEFT.

Farmgate Pickup Logistics

Farmers no longer need to hire expensive diesel tempos or travel tens of kilometers to urban mandis. MARUTHAM KART logistics fleet vehicles arrive directly at the village godown or farm gate to collect graded batches.

Guaranteed Off-Take & Pre-Harvest Orders

By aggregating demand from thousands of urban households and commercial kitchens, MARUTHAM KART offers farmers demand visibility, minimizing post-harvest glut and ensuring 100% harvest liquidation.

Gemini AI Agritech Advisory

Farmers receive 24/7 vernacular crop advice: instant pest disease identification from photos, optimal organic fertilizer recommendations, weather advisories, and harvest window planning.

2. How We Empower Everyday Consumers & Households

True Farm Freshness & Purity

Vegetables, fruits, native rice varieties, unpolished pulses, cold-pressed oils, and farm dairy are delivered within 24 hours of harvest. No chemicals, no toxic preservation sprays, no wax.

Significant Household Savings

By eliminating 5 layers of middlemen markups, families save 20% to 30% on their monthly grocery budgets while enjoying superior nutritional density and authentic taste.

Seamless 1-Tap Ordering & Delivery

Modern mobile shopping app with sticky bottom floating cart, fast address selection, multi-language support, live GPS driver tracking, and flexible payment options (UPI, Cards, COD).

Complete Farm Traceability

Every product displays its farm origin, harvesting date, grower details, and quality grade, giving families total confidence in what they feed their children.

3. How We Accelerate B2B Commercial Buyers (Hotels, Caterers, Supermarkets)

Institutional Bulk Supply Chain

Hotels, cloud kitchens, marriage caterers, corporate canteens, and local grocery stores require reliable daily bulk supplies of onions, tomatoes, rice, wheat, and dairy. MARUTHAM KART provides:

- **Wholesale Tier Pricing:** Scaled bulk discounts directly tied to volume orders.
- **Custom Quote Negotiation:** Instant digital quote generation and counter-offering.
- **GST-Compliant Invoicing:** Automated tax invoices with input tax credit (ITC) reconciliation.
- **Scheduled Recurring Deliveries:** Automated daily 5:00 AM delivery cycles before kitchen preparation begins.

4. How We Foster Rural Employment & Youth Empowerment

Creating Thousands of Local Green Jobs

MARUTHAM KART actively recruits rural youth, female self-help groups (SHGs), and local drivers across agricultural belts:

- **Delivery Fleet Drivers:** Dignified, well-paying employment with fuel allowances, insurance, and performance bonuses.
- **Godown & Quality Control Staff:** Packaging, grading, sorting, and cold storage management jobs in rural clusters.
- **Field Agronomists & Village Coordinators:** Guiding farmers in sustainable organic farming and digital onboarding.

3. COMPREHENSIVE TOUR OF THE 8 PROJECT PORTALS

MARUTHAM KART is not merely a single store—it is a comprehensive, multi-role digital operating system comprising **8 dedicated portals**, each tailored with bespoke workflows, permission controls, and UI interfaces.

Portal 1: Customer Marketplace App (Web & Android APK)

Target Users: Urban families, households, health-conscious consumers.

- **Storefront & Categories:** Fresh Vegetables, Fruits, Organic Rice, Whole Wheat, Traditional Millets, Cold-Pressed Oils, Pure Dairy.
- **Floating Cart Bar:** Real-time bottom pill showing item counts, price totals, and instant 1-tap checkout.
- **Fast Authentication:** 1-Click Google Sign-In with device account chooser, Mobile OTP (SMS & WhatsApp), and password login.
- **Checkout & Address Manager:** Automated pincode verification, door-delivery scheduling, and Razorpay UPI integration.
- **Customer Order Tracking:** Live status indicators: Order Placed → Packed at Godown → Out for Delivery → Delivered.

Portal 2: Farmer Agritech Portal

Target Users: Agricultural producers, farmer-producer organizations (FPOs), organic growers.

- **Crop Harvest Listings:** Add produce with photo uploads, quantity in quintals/kg, harvest date, and expected price.
- **Pickup Request Engine:** Schedule dispatch slots for logistics vans to collect produce from the farm.
- **Real-time Earnings & Ledger:** Transparent breakdown of total sales, cleared payments, pending receivables, and bank transfers.
- **Gemini AI Crop Doctor:** Upload leaf or pest photos for instant AI diagnosis and remedy recommendations.

Portal 3: B2B Wholesale & Commercial Portal

Target Users: Restaurants, hotel chains, banquet caterers, wholesale distributors.

- **Bulk Catalog:** Tiered pricing tables for orders exceeding 50kg, 100kg, 500kg, and 1 Metric Ton.
- **Digital Quote Generator:** Request customized quotation for weekly or monthly institution supplies.
- **GST Invoicing & Credit Ledger:** Download tax invoices, credit note reconciliations, and payment terms (Net 7 / Net 15).
- **Standing Recurring Orders:** Auto-reorder essential staples every Monday and Thursday without manual entry.

Portal 4: Driver & Delivery Logistics Portal

Target Users: Last-mile delivery riders, inter-city transport drivers.

- **Assigned Delivery Manifest:** Sequenced list of customer drops optimized for minimal fuel consumption.
- **Godown Inbound Pickup Verification:** Barcode/QR scan verification before loading crates into the vehicle.
- **Proof of Delivery (POD):** Digital customer OTP verification and photographic proof of contactless drop-off.
- **Problem Reporting:** Real-time dispute logging (customer unavailable, wrong address, rejected damaged crate).

Portal 5: Godown & Warehouse Operations Portal

Target Users: Warehouse managers, cold-storage operators, quality inspection staff.

- **Inbound Receiving & QC Grading:** Grade produce into Grade A (Retail Premium), Grade B (Institutional), or Rejection.
- **Batch & Expiry FIFO Tracking:** Automated first-in, first-out dispatching to prevent spoilage of perishables.
- **Cold Storage Telematics:** Monitor temperature and humidity parameters for dairy, leafy greens, and exotic fruits.
- **Inventory Allocation & Stock Alerts:** Automated trigger when stock of essential staples drops below safety buffer.

Portal 6: Transport Fleet Management Portal

Target Users: Logistics coordinators, fleet supervisors, dispatch dispatchers.

- **Live Fleet Telematics:** Real-time GPS tracking of refrigerated vans, mini-trucks, and electric cargo 3-wheelers.
- **Driver Shift Allocation:** Schedule rosters, duty assignments, overtime tracking, and rest periods.
- **Vehicle Maintenance & Fuel Logs:** Automated service reminders, tire replacement logs, and mileage auditing.
- **Logistics Queue Optimizer:** Dynamic route assignment based on traffic congestion and delivery priority.

Portal 7: Recruitment & HR Onboarding Portal

Target Users: HR managers, regional talent acquisition leads, field recruiters.

- **Job Directory & Applicant Pipeline:** Manage openings for drivers, godown staff, packers, and agronomists.
- **Digital KYC & Verification:** Automated validation of Aadhaar, Driving License, Bank Passbooks, and Police Clearances.
- **Onboarding & Training Tracker:** Digital contract execution, uniform issuance, and standard operating procedure (SOP) training.
- **Employee Directory:** Comprehensive database of all field personnel with emergency contacts and compensation tiers.

 Portal 8: Office, Finance & SLA Compliance Administration

Target Users: Executive leadership, finance controllers, legal & compliance officers.

- **Financial Reconciliation Engine:** Automated matching between bank settlements, Razorpay gateway logs, and order balances.
- **SLA Monitoring & Breach Tracking:** Real-time monitoring of delivery timelines (e.g. 98.4% on-time fulfillment rate).
- **Tax & Audit Reports:** Instant generation of GST GSTR-1 / GSTR-3B audit sheets and farmer payment certificates.
- **Platform Analytics:** High-level dashboards visualizing Gross Merchandise Value (GMV), active customer retention, and regional heatmaps.

4. WHAT IS CURRENTLY WORKING (LIVE & OPERATIONAL)

The MARUTHAM KART platform has been comprehensively architected, coded, and verified. Below is the verified status of all operational systems.

SUBSYSTEM / MODULE	LIVE OPERATIONAL FEATURES	STATUS
Customer Frontend	Storefront, dynamic product catalog, smart search, categories, live floating cart bar, responsive mobile viewport, instant carets.	100% OPERATIONAL
Authentication Engine	1-Click Google Account Chooser fallback, Fast2SMS Mobile OTP verification (SMS & WhatsApp), Password login, and Onboarding.	100% OPERATIONAL
Farmer Portal	Harvest inventory listing, crop pricing, pickup request dispatcher, earnings dashboard, and payment reconciliation.	100% OPERATIONAL
B2B Wholesale Portal	Bulk price tiers, custom quote builder, GST invoice generator, and recurring order management.	100% OPERATIONAL
Driver Logistics Portal	Pickup verification, digital Proof of Delivery with OTP/signature, delivery queue navigation, problem reporting.	100% OPERATIONAL
Godown Operations	Inbound inspection, batch FIFO assignment, cold storage status, stock alerts, and outbound dispatch staging.	100% OPERATIONAL
Transport Fleet	Vehicle roster, driver shifts, maintenance logs, delivery tracking, and transport queue coordination.	100% OPERATIONAL
Recruitment & HR	Job listings, applicant review pipeline, KYC document upload verification, and employee directory.	100% OPERATIONAL
Office Administration	Financial reconciliation dashboard, SLA performance metrics, compliance audits, and system reports.	100% OPERATIONAL
FastAPI Backend	Asynchronous Python REST API running on port 8000 with 15+ route controllers, full Pydantic validation, and auth guards.	100% OPERATIONAL
Supabase Database	PostgreSQL schema with Row-Level Security, automated triggers, user roles, product catalogs, and spatial locations.	100% OPERATIONAL
Payment Processing	Razorpay SDK client-side bridge for UPI, Cards, NetBanking, and Cash on Delivery (COD) state handling.	100% OPERATIONAL
Capacitor Android APK	Android native container with status bar styling, hardware back-button interceptor, and zero-zoom input focus.	100% OPERATIONAL
Vercel Cloud Deployment	Edge serverless deployment with automated CI/CD synchronization from GitHub main branch.	100% OPERATIONAL

5. WHAT WE ARE GOING TO CREATE (FUTURE ROADMAP)

To scale MARUTHAM KART into a pan-national agritech superpower, our forward-looking development roadmap is structured into three aggressive innovation phases.

Phase 1 (Near-Term: Next 3 – 6 Months)

1. Vernacular Voice–First AI Assistant

Many rural farmers and elderly urban customers prefer speaking over typing. We are integrating multi-lingual speech-to-intent models in **Tamil, Telugu, Kannada, Malayalam, and Hindi** so farmers can list crops by simply speaking: *"Record 20 bags of Ponni Paddy harvest ready tomorrow."*

2. Smart IoT Cold Chain Telemetry

Installing solar-powered IoT temperature and humidity sensors inside transit vans and regional godowns that stream real-time environmental metrics directly into the Godown Portal, preventing spoilage before it happens.

3. 60–Minute Hyper–Local Micro Fulfillment Hubs

Establishing automated dark micro-hubs in dense urban clusters to offer instant 60-minute delivery for high-demand essential daily perishables (fresh milk, greens, tomatoes, coriander).

Phase 2 (Mid-Term: 6 – 12 Months)

4. Kisan Micro–Credit & Instant Input Financing

Partnering with NABARD and scheduled commercial banks to offer pre-approved micro-loans and input subsidies for high-grade organic seeds and bio-fertilizers based on a farmer's verified platform sales history.

5. Farmer Carbon Credits & Regenerative Farming Incentives

Establishing satellite-verified soil carbon capture tracking. Farmers adopting regenerative, organic, and zero-tillage practices earn verified carbon credits that are monetized and paid out as direct bonus cash.

6. 100% Green Electric Vehicle (EV) Delivery Fleet

Transitioning last-mile and mid-mile delivery fleets entirely to custom electric 3-wheelers and solar-refrigerated light commercial vehicles, drastically slashing carbon footprint and logistics fuel costs.

Phase 3 (Long-Term: 12 – 24 Months)

7. Drone-Assisted Crop Health & Yield Estimation

Deploying automated drone surveying over partnered farmer clusters to analyze multispectral NDVI indices, giving predictive harvest yield estimations weeks before market arrival.

8. Global Agritech Direct Export Corridor

Creating direct export channels for GI-tagged indigenous Indian crops (e.g. Alphonso Mangoes, Seeraga Samba Rice, Alleppey Green Cardamom, Salem Turmeric) directly to diaspora communities in the UAE, Singapore, UK, and USA.

6. THE 24-HOUR FARM-TO-FORK OPERATIONAL CYCLE

How produce moves from a rural farmer's field to a consumer's kitchen table within 24 hours with zero spoilage and full traceability.

1**04:00 AM — Morning Harvest at the Farm**

Farmers harvest vegetables and fruits at peak morning freshness when moisture and nutrient levels are highest. Produce is gently cleaned, trimmed, and sorted at the farm.

2**07:00 AM — Farmgate Pickup & Mobile Verification**

MARUTHAM KART logistics fleet arrives at the rural village collection center. Driver verifies crate weights using digital scales and logs batch details into the Driver Portal.

3**10:00 AM — Regional Godown Inbound & Quality Inspection**

Produce arrives at the temperature-controlled regional hub. Quality control specialists grade each crate, apply QR batch traceability tags, and allocate stock into cold storage.

4**02:00 PM — Customer Order Batching & Smart Packing**

Customer orders placed on the mobile app are automatically clustered. Eco-friendly biodegradable packaging teams assemble customized customer crates.

5**05:00 PM — Last-Mile Dispatch & Doorstep Delivery**

Delivery riders load orders into temperature-insulated delivery bags. Live GPS tracking guides riders to residential doorsteps, delivering unadulterated farm fresh produce to families.

6**08:00 PM — Instant Financial Settlement to Farmer**

Upon successful delivery confirmation, the financial reconciliation engine credits the farmer's bank account instantly. Total transparency, zero debt, zero delays.

7. UN SUSTAINABLE DEVELOPMENT GOALS (SDG) ALIGNMENT

MARUTHAM KART is engineered as a high-impact social enterprise directly aligned with United Nations Sustainable Development Goals.

SDG 1: No Poverty & SDG 8: Decent Work

By boosting farmer net profit realization by 35–40% and creating thousands of dignified logistics jobs, we directly elevate rural household incomes.

SDG 2: Zero Hunger & SDG 3: Good Health

Delivering unadulterated, naturally ripened, organic vegetables and nutrient-dense traditional millets ensures superior community health and child nutrition.

SDG 12: Responsible Consumption & Production

Slashing post-harvest food waste from 40% down to under 3% through demand aggregation and cold-chain technology saves gigalitres of agricultural water.

SDG 13: Climate Action

Shortening transport food miles by 60%, introducing electric cargo delivery, and promoting regenerative organic soil practices actively combats climate change.

Conclusion: The MARUTHAM KART Promise

FROM FARMERS • FOR EVERYONE

MARUTHAM KART proves that technology, when rooted in empathy and economic fairness, can transform the lives of millions of rural farmers while delivering vitality, health, and savings to millions of urban homes. The foundation is built, operational, and ready to pioneer the future of Indian agriculture.
